Nova Systems wins award

At the presentation of the Italian terminal and logistics awards in Piacenza the logistics software company Nova Systems won the prize in the category "best service company of 2019". Nova Systems runs branches in Italy, Spain and France and develops cloud-based software solutions for logistics operators and customs agencies.

The provider's most recent innovation is the new version of the Be One-Suite, which is designed for shipping companies and port agents. The software can be used to administer shipments and process invoices. (mw)
